

Firmicus Maternus: Deciphering the Lunar-Phoenix Matrix

“The beginning of anything was to be found out by the unfolding of historical events.” Firmicus Maternus.

“The last pages of a book are already contained in the first pages.”

“Future events are wholly contained in preceding ones, and if we could know the force and direction of all events which have happened up to the present moment, i.e. if we knew all the past, by this we could know all the future.” P.D. Ouspensky.

The sun has a pattern, called the solar cycle, which is 11.5 years. It should come as no surprise that this cycle is 138 months.

Reducing these historical events all connected in multiples of 138 months to their lowest common denominators as well as considering the frequency of times the same events are references but at different years in history, these events construct for us the single year of 2040. Remember, future events are wholly contained in preceding ones, and these pieces can be assembled to build a picture of a future time period. In this analysis these events show us that in 2040-

A gigantic mystery body is reported to be seen approaching and there is heightened activity at Cheyenne Mountain. Increased radioactivity is reported from the sky. A comet is reported as well as another mystery body located near Venus. A world war is occurring involving India and Pakistan, China and Japan, European nations and Italy, Arab nations attack Israel and control Mediterranean, genocide in Africa, Jews are expelled from countries, Asian invaders flood Middle East and take Baghdad [Babylon] as well as make inroads into Europe. Only puzzling part to me are these facts that I can't seem to fit in. Do they happen in 2040 before the Phoenix event or just after? Here they are-

Jesuits are either destroyed or empowered

A member of the Order of the Dragon rises to power

A few more intriguing calendrics:

1147 AD is 893 years before 2040, or 552×1.618 . Christian lose battle for Jerusalem in Second Crusade

1607 AD is 433 years before 2040, or 138×3.14 . English set up Jamestown as first permanent colony in North America

1776 to 1860 is 84 years. US Independence to the Civil War start. $84 \times \pi$ is 263.76. July 4th 1776 plus 264.76 is 2040.4, or MAY 2040.
